

NORTHSTAR

SHAFT LOCK-DOWN

NEW PRODUCT

Northstar's shaft lock-down unit will prevent cooling tower fans from free spinning during shut-downs or reverse rotation during high wind conditions. These units will allow you to:

- Safely service your cooling towers.
- Prevent structural, fan and fan-shroud damage to cooling towers during high wind conditions.

The units are:

- Economical and easy to install.
- Manually, electrically or hydraulically operated.
- Local or remote activation.

Give us a call to learn more about Northstar's Lock-Down unit and how it can help you operate safer.
